DEPARTMENT OF ATMOSPHERIC SCIENCE

14 November 1969

Dr. Jule Charney
Department of Meteorology
Massachusetts Institute of Technology
Cambridge, Massachusetts 02139

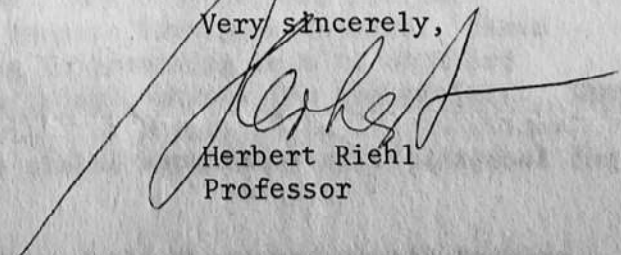

Dear Jule:

I have received a very comprehensive conference program at Miami beginning on December 5, and I promise to attend as much of this as I can possibly manage and will be useful to you. Dr. Pearce is also coming as we had discussed.

It now appears that this will be quite a full dress meeting, a relatively rare occasion. I would like to propose that you formally invite Mr. John O'Byrne, Caixa Postal ZC-743-00, Rio de Janeiro, UNDP, Phone 25-9483 and/or Coronel Teodoro Rodriguez Texeiro, Caixa Postal 2741, Recife, Pernambuco, Brazil, phone 2-6609, for a presentation of the Northeast Brazil joint WMO-Brazil project as a possible site for a GARP Tropical Experiment. John O'Byrne is the WMO co-director and Coronel Texeiro is the Brazilian co-director of the Northeast Brazil Project. Such a visit will make JOC fully aware of the potentialities there without obliging it in any way whatsoever.

With my best personal regards, also to Mrs. Charney,

Very sincerely,

Herbert Riehl
Professor
