

Edward Norton Lorenz

Bibliography

Edward Norton Lorenz—Bibliography

(As listed at <http://eapsweb.mit.edu/research/Lorenz/publications.htm>)

- (1) 1950 Dynamic models illustrating the energy balance of the atmosphere. *J. Meteor.*, 7, 30-38.
- (2) 1951 Seasonal and irregular variations of the northern hemisphere sea-level pressure profile. *J. Meteor.*, 8, 52-59.
- (3) 1952 Flow of angular momentum as a predictor for the zonal westerlies. *J. Meteor.*, 9, 152-157.
- (4) 1953 The interaction between a mean flow and random disturbances. *Tellus*, 3, 238-250.
- (5) 1953 A proposed explanation for the existence of two regimes of flow in a rotating symmetrically-heated cylindrical vessel. *Fluid Models in Geophysics, Proc. 1st Sympos. Models in Geophys. Fluid Dynamics*, Baltimore, Johns Hopkins U., 73-80.
- (6) 1953 A multiple-index notation for describing atmospheric transport processes. *Geophys. Res. Papers*, 24, 100-110.
- (7) 1953 Displacement and intensification associated with variations of local angular momentum. *Geophys. Res. Papers*, 24, 164-170.
- (8) 1953 The vertical extent of Jupiter's Atmosphere. *Geophys. Res. Papers*, 24, 123-127.
- (9) 1954 A study of the general circulation and a possible theory suggested by it. *Sci. Proc. Internat. Assoc. Meteor.*, Rome, 603-608.
- (10) 1955 Available potential energy and the maintenance of the general circulation. *Tellus*, 7, 271-281.
- (11) 1955 Generation of available potential energy and the intensity of the general circulation. *Scientific Report No. 1*, UCLA, Dept. of Meteorology, July 1955.
- (12) 1956 Empirical orthogonal functions and statistical weather prediction. *Scientific Report No. 1*, Statistical Forecasting Project. Air Force Research Laboratories, Office of Aerospace Research, USAF, Bedford, MA,
- (13) 1957 Static stability and atmospheric energy. *Scientific Report No. 9*, General Circulation Project, Starr, V. P., director, Geophysics Research Directorate of the Air Force Cambridge Research Center, 41 pp.
- (14) 1960 Generation of available potential energy and the intensity of the general circulation. *Dynamics of Climate* (R. L. Pfeffer, Ed.), Oxford, Pergamon Press.
- (15) 1960 Maximum simplification of the dynamic equations. *Tellus*, 12, 243-254.
- (16) 1960 Energy and numerical weather prediction. *Tellus*, 12, 364-373.
- (17) 1961 A numerical study of the effect of vertical stability on monsoonal and zonal circulations. (with E. B. Kraus). *Changes of Climate*, UNESCO, Belgium, pp. 361-372.
- (18) 1962 Simplified dynamic equations applied to the rotating-basin experiments. *J. Atmos. Sci.*, 19, 39-51.
- (19) 1962 The statistical prediction of solutions of dynamic equations. *Proc. Internat. Sympos. Numerical Weather Prediction*, Tokyo, 629-635.
- (20) 1963 The predictability of hydrodynamic flow. *Trans. N.Y. Acad. Sci.*, Ser. II, 25, No. 4, 409-432.
- (21) 1963 Deterministic nonperiodic flow. *J. Atmos. Sci.*, 20, 130-141.
- (22) 1963 The mechanics of vacillation. *J. Atmos. Sci.*, 20, 448-464.
- (23) 1964 The problem of deducing the climate from the governing equations. *Tellus*, 16, 1-11.
- (24) 1965 Energetics of atmospheric circulation. *International Dictionary of Geophysics*, Pergamon Press, 1-9.
- (25) 1965 On the possible reasons for long-period fluctuations of the general circulation. *WMO-IUGG Symp. on Research and Development Aspects of Long-range Forecasting*, Technical Note No. 66, WMO-No. 162.TP.79, 203-211.
- (26) 1965 A study of the predictability of a 28-variable atmospheric model. *Tellus*, 17, 321-333.
- (27) 1966 Atmospheric predictability. *Advances in Numerical Weather Prediction*. The Travelers Research Center, Inc., 34-39.
- (28) 1966 Nonlinearity, weather prediction, and climate deduction. Final report, Statistical Forecasting Project, Air Force Cambridge Research Laboratories, Office of Aerospace Research, USAF, Bedford, MA, 22 pp.
- (29) 1966 The circulation of the atmosphere. *Amer. Scientist*, 54, 402-420.
- (30) 1966 Numerical experiments with large-scale seasonal forcing (with E. B. Kraus). *J. Atmos. Sci.*, 23, 3-12.
- (31) 1966 Reply. *J. Atmos. Sci.*, 23, 629-630.
- (32) 1966 Large-scale motions of the atmosphere: circulation. *Advances in Earth Science*, MIT Press, 95-109.
- (33) 1967 The nature and theory of the general circulation of the atmosphere. [Part 1] [Part 2] [Part 3] *World Meteorological Organization*, No. 218, TP 115, 161 pp.
- (34) 1967 The nature and theory of the general circulation of the atmosphere. *WMO Bulletin*, April 1967, 74-78.
- (35) 1968 Climatic determinism. *Meteor. Monographs*, Amer. Meteor. Soc., 25, 1-3.
- (36) 1969 The predictability of a flow which possesses many scales of motion. *Tellus*, 21, 19 pp.
- (37) 1969 Three approaches to atmospheric predictability. *Bull. Amer. Meteor. Soc.*, 50, 345-351.
- (38) 1969 Atmospheric predictability as revealed by naturally occurring analogues. *J. Atmos. Sci.*, 26, 636-646.

- (39) 1969 Studies of atmospheric predictability. [Part 1] [Part 2] [Part 3] [Part 4] Final Report, February, Statistical Forecasting Project. Air Force Research Laboratories, Office of Aerospace Research, USAF, Bedford, MA, 145 pp.
- (40) 1969 The nature of the global circulation of the atmosphere: a present view. *The Global Circulation of the Atmosphere*, London, Roy. Meteor. Soc., 3-23.
- (41) 1969 How much better can weather prediction become? *Technology Rev.*, July/August, 39-49.
- (42) 1970 Climatic change as a mathematical problem. *J. Appl. Meteor.*, 9, 325-329.
- (43) 1970 Forecast for another century of weather progress. *A Century of Weather Progress*. Amer. Meteor. Soc., 18-24.
- (44) 1971 An N-cycle time-differencing scheme for stepwise numerical integration. *Mon. Wea. Rev.*, 99, 644-648.
- (45) 1972 Investigating the predictability of turbulent motion. *Statistical Models and Turbulence*, Proceedings of symposium held at the University of California, San Diego, July 15-21, 1971, Springer-Verlag, pp. 195-204.
- (46) 1972 Barotropic instability of Rossby wave motion. *J. Atmos. Sci.*, 29, 258-264.
- (47) 1972 Low-order models representing realizations of turbulence. *J. Fluid Mech.*, 55, 545-563.
- (48) 1973 Predictability and periodicity: A review and extension. *Proc. 3rd Conf. Prob. and Statis. In Atmos. Sci.*, Amer. Meteor. Sci., 1-4.
- (49) 1973 On the existence of extended range predictability. *J. Appl. Meteor.*, 12, 543-546.
- (50) 1975 Climatic predictability. *GARP Publications Series*, April, pp. 132-136.
- (51) 1976 Nondeterministic theories of climatic change. *Quaternary Res.*, 6, 495-506.
- (52) 1976 A rapid procedure for inverting del-square with certain computers. *Mon. Wea. Rev.*, 104, 961-966.
- (53) 1976 Limitations on weather prediction. *Colloquium on Weather Forecasting and Weather Forecasts: Models, Systems, and Users*, Boulder, CO., Notes from a Colloquium, vol: 1 pp. 214 -218.
- (54) 1977 An experiment in nonlinear statistical weather forecasting. *Mon. Wea. Rev.*, 105, 590-602.
- (55) 1978 A reply to comments by Franz Fliri. Letter to the editor, University of Washington, 249-250.
- (56) 1978 Available energy and the maintenance of a moist circulation. *Tellus*, 30, 15-31.
- (57) 1979 Numerical evaluation of moist available energy. *Tellus*, 31, 230-235.
- (58) 1979 Forced and free variations of weather and climate. *J. Atmos. Sci.*, 36, 1367-1376.
- (59) 1979 On the prevalence of aperiodicity in simple systems. *Global analysis*, New York, Springer Verlag, 53-75.
- (60) 1980 Noisy periodicity and reverse bifurcation. *Ann. N.Y. Acad. Sci.*, 357, 282-291.
- (61) 1980 Attractor sets and quasi-geostrophic equilibrium. *J. Atmos. Sci.*, 37, 1685-1699.
- (62) 1980 Nonlinear statistical weather prediction. [Abstract only] *WMO Symposium on the Probabilistic and Statistical Methods in Weather Forecasting*, Nice, Sept. 8-12, 1980, Collection of papers presented, Geneva, World Meteorological Organization, [1980]. pp. 3-8.
- (63) 1982 Low-order models of atmospheric circulations. *J. Meteor. Soc. Japan*, 60, 1, 255-267.
- (64) 1982 Atmospheric predictability experiments with a large numerical model. *Tellus*, 34, 505-513.
- (65) 1982 Some aspects of atmospheric predictability. *European Centre for Medium Range Weather Forecasts, Seminar 1981: problems and prospects in long and medium range weather forecasting*, 14-18 September, Reading, Eng., March, 1982. pp. 1-20. 1982. Also in *Problems and Prospects in Long and Medium Range Weather Forecasting* (D. M. Burridge and E. Kallen, eds.), Berlin Heidelberg, Springer-Verlag, 1-20.
- (66) 1983 A history of prevailing ideas about the general circulation of the atmosphere. *Bull. Amer. Meteor. Soc.*, 64, 730-734.
- (67) 1983 Crafoord Prize announcement. *Tellus*, 36A, 97.]
- (68) 1984 Formulation of a low-order model of a moist general circulation. *J. Atmos. Sci.*, 41, 1933-1945.
- (69) 1984 Estimates of atmospheric predictability at medium range. *Predictability of Fluid Motions* (G. Holloway and B. West, eds.), New York, American Institute of Physics, 133-139.
- (70) 1984 Irregularity: a fundamental property of the atmosphere. Crafoord Prize Lecture, presented at the Royal Swedish Academy of Sciences, Stockholm, September 28, 1983. *Tellus*, 36A, 98-110.
- (71) 1984 The local structure of a chaotic attractor in four dimensions. *Physica*, 13D, 90-104.
- (72) 1984 A very narrow spectral band. *J. Stat. Phys.*, 36, 1-14.
- (73) 1985 The growth of errors in prediction. In *Turbulence and Predictability in Geophysical Fluid Dynamics and Climate Dynamics*, Soc. Italiana di Fisica, Bologna, Italy, 243-265.
- (74) 1985 Lyapunov numbers and the local structure of attractors. *Physica*, 17D, 279-294.
- (75) 1986 The index cycle is alive and well. In *Namias Symposium*, Roads, J. O., ed. California. Univ., Scripps Institution of Oceanography, La Jolla, SIO Reference 86-17, Aug., 1986. pp. 188-196. 1986.
- (76) 1986 On the existence of a slow manifold. *J. Atmos. Sci.*, 43, 1547-1557.
- (77) 1986 Atmospheric models as dynamical systems. *Perspectives in Nonlinear Dynamics*, World Scientific Publishing Co., 1-17.
- (78) 1987 Deterministic and stochastic aspects of atmospheric dynamics. *Irreversible Phenomena and Dynamical Systems Analysis in Geosciences*. D. Reidel Publishing Co., 159-179.

- (79) 1987 Low-order models and their uses. *Irreversible Phenomena and Dynamical Systems Analysis in Geosciences*. D. Reidel Publishing Co., 557-567.
- (80) 1987 On the nonexistence of a slow manifold (with V. Krishnamurthy). *J. Atmos. Sci.*, 44, 2940-2950.
- (81) 1989 Effects of analysis and model errors on routine weather forecasts. *Ten Years of Medium-Range Weather Forecasting*. Reading, England, European Centre for Medium-Range Weather Forecasts (ECMWF), pp. 115-128.
- (82) 1989 Computational chaos: a prelude to computational instability. *Physica*, 35D, 299-317.
- (83) 1990 Can chaos and intransitivity lead to interannual variability? *Tellus*, 42A, 378-389.
- (84) 1990 Charney—a remarkable colleague. In *The Atmosphere—a challenge, the science of Jule Gregory Charney*, Lindzen, R. S., Lorenz, E. N., and Platzman, G. W., eds. Boston, MA, American Meteorological Society, pp. 89-91.
- (85) 1991 Chaos, spontaneous climatic variations and detection of the greenhouse effect. *Greenhouse-Gas-Induced Climatic Change: A Critical Appraisal of Simulations and Observations*, M. E. Schlesinger, Ed. Elsevier Science Publishers B. V., Amsterdam, pp. 445-453.
- (86) 1991 The general circulation of the atmosphere: an evolving problem. *Tellus*, 43AB, 8-15.
- (87) 1991 Dimension of weather and climate attractors. *Nature*, 353, 241-244.
- (88) 1992 The slow manifold: What is it? *J. Atmos. Sci.*, 49, 2449-2451.
- (89) 1993 *The Essence of Chaos*. Univ. of Washington Press, Seattle, 227 pp.
- (90) 1996 The bulletin interviews. *WMO Bulletin*, Vol. 45, No. 2.
- (91) 1996 The evolution of dynamic meteorology. *Historical essays on meteorology 1919-1995*, J. R. Fleming, Ed., Amer. Meteor. Soc., 3—19.
- (92) 1998 Optimal sites for supplementary weather observations: simulations with a small model (with K. A. Emanuel). *J. Atmos. Sci.*, 55, 399-414.
- (93) 2005 Some reflections on the theoretical predictability of climate. [Abstract only] Ed Lorenz Symposium, San Diego, CA, 8-14 January. American Meteorological Society.
- (94) 2005 Designing chaotic models. *J. Atmos. Sci.*, 62, 1574-1587.
- (95) 2005 A look at some details of the growth of initial uncertainties. *Tellus*, 57A, 1-11.
- (96) 2006 Predictability—a problem partly solved. In *Predictability of Weather and Climate*, ed. Tim Palmer and Renate Hagedorn. Cambridge University Press, 40-58.
- (97) 2006 Reflections on the conception, birth, and childhood of numerical weather prediction. *Ann. Rev. Earth Planetary Sci.*, 34, 37-45.
- (98) 2006 An attractor embedded in the atmosphere. *Tellus*, 58A, 425-429.
- (99) 2006 Computational periodicity as observed in a simple system. *Tellus*, 58A, 549-557.
- (100) 2006 Regimes in simple systems. *J. Atmos. Sci.*, 63, 2056-2073.
- (101) 2008 Compound windows of the Hénon map. *Physica D*, 237, 1689-1704.
- (102) 2008 Reply to comment by L.-S. Yao and D. Hughes. *Tellus*. To be published.

Miscellaneous (lectures, autobiographical works, etc.)

- (103) 1970 Progress report on atmospheric predictability. Never printed.
- (104) 1972 Limits of meteorological predictability. Prepared for the American Meteorological Society, February.
- (105) 1972 "Predictability: Does the Flap of a Butterfly's Wings in Brazil Set Off a Tornado in Texas?" Talk presented Dec. 29, AAAS Section on Environmental Sciences, New Approaches to Global Weather: GARP. Sheraton Park Plaza Hotel, Boston, Mass.
- (106) 1979 Dynamical and empirical methods of weather forecasting. November. Unknown context.
- (107) 1987 The Ideal Hadley Circulation: Fundamental Flow or Fairy Tale? [Starr lecture]
- (108) 1991 Reply to questionnaire. For Kyoto Award.
- (109) 1991 A scientist by choice. Kyoto Award lecture.
- (110) 1997? Climate is what you expect. [Prepared for publication by NCAR; unknown if actually printed. Possibly related to presentation at NCAR colloquium, Applications of statistics to modeling the Earth's climate system, November 1994.]
- (111) 1999? The simplest chaotic Hamiltonian system. *Physica D*. Withdrawn ?
- (112) 2007 Foreword. *Empirical methods in short-term climate prediction*, van den Dool, H., ed. Oxford University Press, pp. xi-xii.
- (113) 2008 The butterfly effect. Premio Felice Pietro Chisesi e Caterina Tomassoni award lecture, University of Rome, Rome, April.
- (114) Date unknown: Chaos and the weather forecast.
